

around the world. The first Earth Day in 1970 rallied over 20 million Americans from around the country to learn about our environment. Conceived by Senator Gaylord Nelson and organized by Dennis Hayes, Earth Day events have featured some of the largest grassroots mobilizations in U.S. history. These early events helped create the modern environmental movement and led directly to the first environmental legislation—the Clean Air and Clean Water Acts.

In the late 1980's, Dennis Hayes decided it was time to expand Earth Day internationally and to renew environmental concern in the United States. Earth Day is now a highly anticipated annual event held in April that draws upon the resources, concern, and energy of countless individuals throughout our planet for the critical purpose of preserving it.

Earth Day is a gentle reminder to all of us that the environment is everyone's issue. Earth Day observance rekindles public commitment, broadens the base of support for environmental programs, and encourages participation from every group, including the business community. Earth Day is a successful catalyst for ongoing environmental education, action and change. Earth Day activities offer important points of entry to address worldwide environmental concerns as well as opportunities for individuals and communities to focus on their local environmental problems.

Residents of my congressional district are planning a variety of events under the direction of the Bay Area Action group. Some community gardens will host volunteer work parties on Earth Day weekend while some restaurants will offer "Earth Day Meals." These events and efforts characterize a national will to improve and protect our environment for ourselves, our children, and our grandchildren.

There is clearly a hunger in our Nation today, not only for more security or for more economic opportunity, but also for something which we can all be involved in that is larger than ourselves and that will have a lasting and positive impact. Reclaiming our rivers, our forests, improving the quality of our air, and limiting the volume of waste we generate, are the causes of a committed generation of human beings doing their part for the betterment of our planet as a whole.

We are fighting a serious uphill battle, however. The new majority in Congress, this past year, has turned its back repeatedly on our environment. There is no question that this has been the most antienvironmental Congress in recent history and the blame, undoubtedly, falls squarely upon the shoulders of the majority of this House. Let us not belittle the meaning of Earth Day with phony rhetoric; let us match the commitment from our citizens with actions that safeguard our future.

Three decades ago, President Kennedy said, "It is our task and our time in our generation to hand down, undiminished to those who come after us, as was handed down to us by those who came before, the natural wealth and beauty which is ours." It is time to recommit ourselves to these same values that originally made America unique.

The preservation of our environment is not synonymous with erosion of the economy. It does mean, however, that Congress has tough choices to make. We cannot deny the fact that Government has an important role in helping to preserve the natural beauty of our rivers, our forests, our mountains, our beaches, and our parks.

Earth Day reminds us that we share the air, the water, the planet and our destiny with all the people of the world. Our efforts must extend beyond our borders to help people in poorer countries understand the effects of their actions. Every country is interconnected; a potential environmental catastrophe can affect us all. That certainly is the message as we come upon the 10th anniversary of the Chernobyl disaster in Russia, at the same time that we mark Earth Day. The United States should lead the world by being a shining example.

Mr. Speaker, that is why I stand here today, requesting the support of my colleagues. We must never turn our back on our Nation's environment. I hope that the antienvironment trend of this Congress can be overcome with tangible legislation that recommit our Government to protecting our environment.

Mr. Speaker, we can all learn from the millions of individuals who will participate in Earth Day this year and years to follow. Ultimately, it is through them that we must come to understand that part of our common responsibility to the future is preserving our environment today. Let us not acquiesce to the defilement of our environment; we must not let our inaction serve as a precedent for emerging nations throughout the world to ignore their role in preserving it. There can be no greater legacy that we leave behind for our children and grandchildren than a world secure in its commitment to a healthy and environmentally sound future.

TRIBUTE TO WILLIAM C. CASSELL
ON THE OCCASION OF HIS RETIREMENT FROM HEIDELBERG COLLEGE

HON. PAUL E. GILLMOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1996

Mr. GILLMOR. Mr. Speaker, it gives me great pleasure to rise today to pay tribute to an outstanding citizen from Tiffin, OH. Dr. William C. Cassell, president of Heidelberg College has announced he will retire at the end of this school year.

Dr. Cassell's retirement marks the end of a 16 year era in Heidelberg's development. In 1980, William Cassell became the 11th President of Heidelberg College, one of Ohio's oldest colleges. Under his leadership, the college has made a significant turnaround, enjoying a large increase in enrollment, the elimination of huge deficits, and widespread recognition as a leaders in innovation liberal arts and international education.

Heidelberg College is a selective, independent, liberal arts college situated atop College Hill in Tiffin, OH. For 8 consecutive years, it has been ranked as "One of America's Best Colleges" by U.S. News and World Report.

There is a saying about education that brings President Cassell to mind. "When you teach the people, you reap hundred harvests." William Cassell, after a career of distinguished service, should feel the deep satisfaction that comes from creating the harvests of our future. He has been a creative, innovative, and reliable education leader. Over the years, he has worked tirelessly to make the best possible use of Heidelberg's resources for the sake of the education of each student. In the

process, he has led a staff and an education community that has mirrored his special sense of dedication and service.

William Cassell's commitment to education has stretched far beyond Heidelberg's campus. He was chosen by the former President of the United States as one of 10 appointees to the Advisory Council on the White House Conference on Library and Information Services. In 1988, the former Governor of Ohio appointed Cassell as one of nine members of the Ohio Higher Education Facilities Commission. Internationally, Cassell is the Honorary Royal Consul General of Nepal. He was a member of missions for American Management Techniques to Indonesia and Jamaica, and chief of a mission to Thailand. He is on the executive committee of the International Education of the American Council of Education. Along the way, he has always earned the respect and admiration of his peers in the field.

I ask my colleagues to join me today in recognizing Dr. William Cassell on the occasion of his retirement, and wish him, his wife Jeanne, and their three children, Paul, Susan, and David, all the best in the years ahead.

EARTH DAY 1996

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1996

Mr. MANTON. Mr. Speaker, I rise today in recognition of Earth Day 1996. During this Congress it is especially crucial to emphasize the significance and purpose of this nationally recognized day. Since 1970, this country has set aside 1 day a year to highlight the importance of environmental conservation and preservation. But protecting the environment and our national resources is not a once a year project, it is about the way we choose to live our lives.

Mr. Speaker, the nationwide recognition of this day illustrates the overwhelming public concern over how the natural and man-made world should interact. While I support efforts to relieve businesses of undue redtape, I believe it is possible to do so without also reducing protection of our air, water and other natural resources. Although striking a balance is often difficult, it is necessary for the long-term health of both the environment and the economy.

As a Member of this esteemed body, I am pleased with the role Congress has played over the past 26 years. Passage of legislation such as the Clean Water Act, Clean Air Act, the Endangered Species Act, among others, has been instrumental in cleaning our environment and protecting our valuable natural resources. It is our responsibility as legislators to continue to respond to the public and its priorities through enactment and renewal of these most important environmental laws.

Mr. Speaker, I am hopeful that this day will be a reminder to Congress that the management of our resources is of vital importance. The decisions we make today will impact not only our future, but all future generations.
